

# COVESA

Accelerating the future of connected vehicles

Connected Vehicle Systems Alliance (COVESA), was formed with one goal in mind: to develop common approaches and technologies that accelerate innovation for connected vehicles, creating a more diverse, sustainable, and integrated data-driven mobility ecosystem.

## COVESA Ecosystem Benefits

### OPEN & GLOBAL

Global professionals developing open standards for connected vehicles.

### MEMBER-CENTRIC

Global professionals developing open standards for connected vehicles.

### VIBRANT ECOSYSTEM

Bringing buyers and sellers together to accomplish business goals, supporting the adoption of alliance results.

### PROJECT CONTAINER

Bring your challenges and projects to COVESA and leverage members' expertise to create common approaches.

## Collaborative Projects & Groups

COVESA's connected vehicle projects support services, interfaces, and data exchange, in and out of the vehicle, and in the cloud.

### EXISTING COVESA GROUPS / PROJECTS

- Data Expert Group including:
  - Vehicle Signal Specification (VSS)
  - Data Models/Ontologies
  - Vehicle Interface Definition
  - Data Architectures/Infrastructure
- Electric Vehicle Charging Expert Group
- Automotive AOSP App Framework Standardization Expert Group

### EMERGING COVESA TOPICS FOR FUTURE PROJECTS

- Vehicle Experience & Content/Entertainment
- In-Vehicle Commerce
- Commercial Vehicles and Fleet Management
- Device Abstraction

**Members are welcome to contribute topics!**

COVESA code is openly available on GitHub, and information about technical participation in COVESA projects can be found at [wiki.covesa.global](http://wiki.covesa.global).

## COVESA Membership Benefits

- **Influencing common approaches developed in COVESA**
- **Free access to member meetings**
- **Increased company and product awareness through COVESA showcase events at high-profile industry events like CES and AutoTech**

Current members include leading global automakers, vehicle component suppliers, software services companies, and start-ups. Become a member now and participate in member-driven projects that advance common approaches for the industry and benefit your own business and technology goals.
